## NAPA HANGING BOWL ASSEMBLY INSTRUCTIONS

### ATTACH ROPE HANGER

THE ROPE HANGER HAS THREE ENDS WITH METAL FASTENERS. THE PLANTER HAS THREE HOLES AROUND THE EDGE. SLIDE ONE METAL END OF THE ROPE INTO EACH HOLE OF THE PLANTER FROM THE OUTSIDE.

### DO NOT UNTIE ROPE

THE INCLUDED NYLON ROPE IS PRE-KNOTTED WITH A LOOP FOR EASY HANGING FROM ANY HOOK OR PLANT HANGER.

### SECURE METAL FASTENERS

ONCE ALL THREE ENDS HAVE BEEN PUSHED THROUGH, BEND THE ROPE WHERE IT JOINS THE METAL FASTENER INTO A "T" SHAPE SO IT CANNOT SLIP BACK THROUGH THE HOLE. WEIGHT FROM PLANTING WILL HELP SECURE AND REINFORCE THE BENT SHAPE OF THE ROPE.

### HOW IT WORKS: WATER-MINDER™ SUB-IRRIGATED RESERVOIR

Pack wicking chamber with potting soil. Continue filling the pot with more soil, and plant.

Generously water your plants after initial planting. If using indoors, keep the rubber plug in place. If using outdoors, remove plug. Excess water will overflow from the bottom when reservoir capacity is full (only when plug is removed). Water reserve will be used by the plant as needed.

Be sure to water plants on a regular schedule according to their needs.
